BED HEIGHT RANGE

285 - 685 mm

BACKREST INCLINE/DECLINE

70°

KNEE BEND INCLINE/DECLINE

35°

HIGH SAFE WORKING LOAD

**STYLE**

The AC3 King Single bed is designed to facilitate a homely environment for residents. Head and Foot boards can be removed to meet interior design requirements and the bed frame is compatible with valances, wooden surrounds, wall mounted head boards and comforter bed covers.

**SAFETY**

Mobility challenges, dementia, vertigo, memory loss and vision impairment are common ailments and contributors to falls risk. The wide surface of the AC3 King Single bed reduces the risk of falling out of bed. Residents feel more comfortable, whilst carers can have greater peace of mind for a resident's safety.

**COMFORT**

Transitioning from a home to a care environment is life changing and can be daunting. Most residents are used to the space of a double or queen size bed so moving to a single bed can be disconcerting. The AC3 King Single bed provides more room for residents to move and reposition in familiar comfort.
